

Hush Acoustic Panels

Sound absorbing panel system

Stylish and versatile acoustic control

Hush Acoustic Panel

Versatile panels for walls and ceiling in a vast array of shapes and sizes.

Hush Cloud Acoustic Panel

Create a comfortable, welcoming and fun environment.

Hush Acoustic Panels available in multiple shapes and sizes

Class A-rated sound absorption

Hush Acoustic panels are used to remove echoes from rooms and improve speech audibility. We use Class A-rated sound absorption material on the market in our products. Our acoustic panels add both colour and style to your room, our range includes several fabric, colour and shape options.

We can tailor a suitable acoustic panel solution just for you and can even print the picture you want on it.

The flexibility with the colours and surface materials allows the product to serve as an impressive decorative element. Hush Acoustic Panels are an effective sound absorption solution for rooms of all sizes, from small offices to large public facilities. A sound-filtered space helps people focus and serves as a sound shelter.

Acoustic panels can be wall mounted, ceiling mounted, ceiling hung or mobile

Hush Hybrid

The perfect acoustic panel and ceiling microphone conferencing solution.

Hush Wall

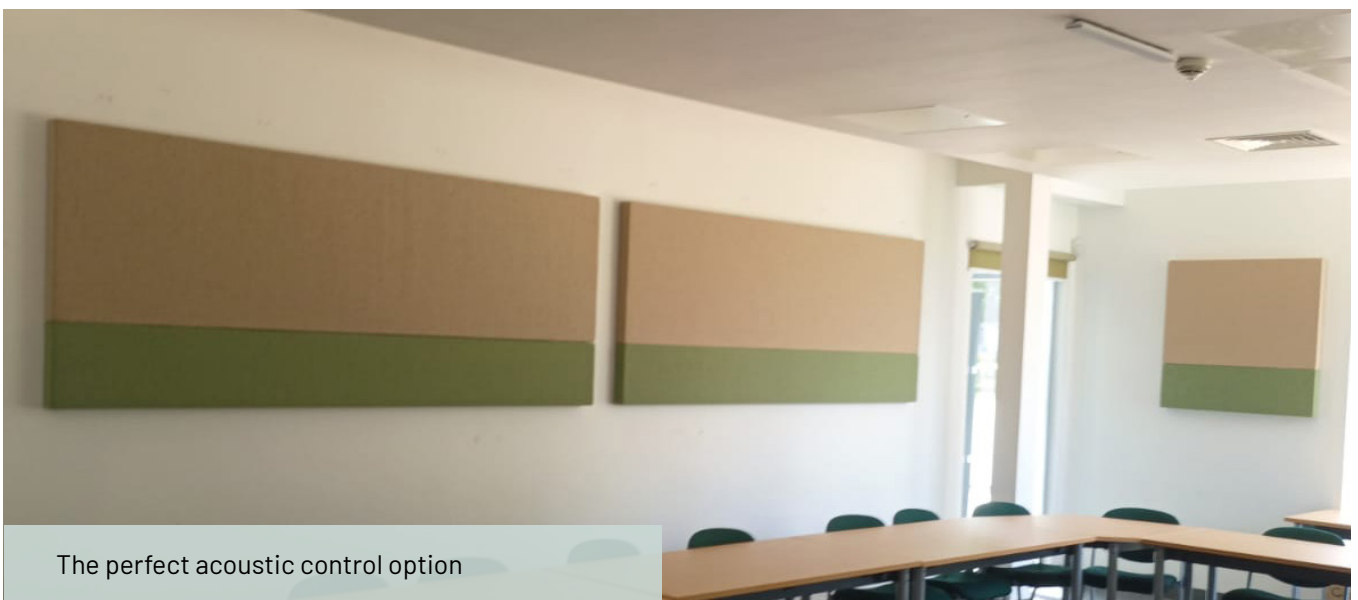

Multi-purpose mobile partition, acoustic control, writing and pinable.

Hush Light

Combine shades and
create your own interior

All Hush Light Acoustic panels have Class A sound attenuation. The fabric colour options of the Hush Light Acoustic panels complete the look of any space.

Produced with high quality wrap around upholstery. Pins can be used to attach notes to the surface of the panel, in which case the board also acts as a notice board.

Convenient fastening mechanism with hidden buttons, requires no gluing. The panels are suitable for spaces where you want to reduce noise and echo. Suitable for schools, offices, universities, restaurants and public spaces.

Create your own unique designs

A vast array of colours to choose from

Combine shades and create your own interior

Hush Light Round

Light as a feather
acoustic panel

The Hush Light Round Acoustic Panel is a sound-absorbing panel that can be used to reduce unwanted noise. The panel can be mounted on the wall or on the ceiling.

Colourful round panels add visual impact

The panels are fixed to the wall or ceiling with concealed brackets. Hush Light Round Acoustic Panel is upholstered with fabric with different colour options.

Camira Cara fabric is ideal for sound absorbing boards. The panel's appearance is finished with machine sewn edges. Other fabrics are also available at the customer's choice. The Hush Light Round Acoustic Panel is also available with Photo Print fabric.

Ceiling hung panels provide excellent sound control for large busy space

Personalised images can be reproduced and printed

Wall filling potential

Concealed button fastening

Create modern,
stylish wall art

Hush Light Cloud

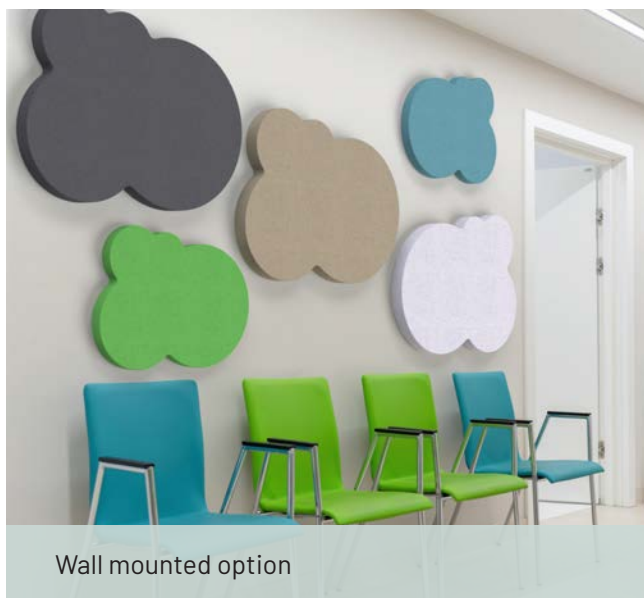

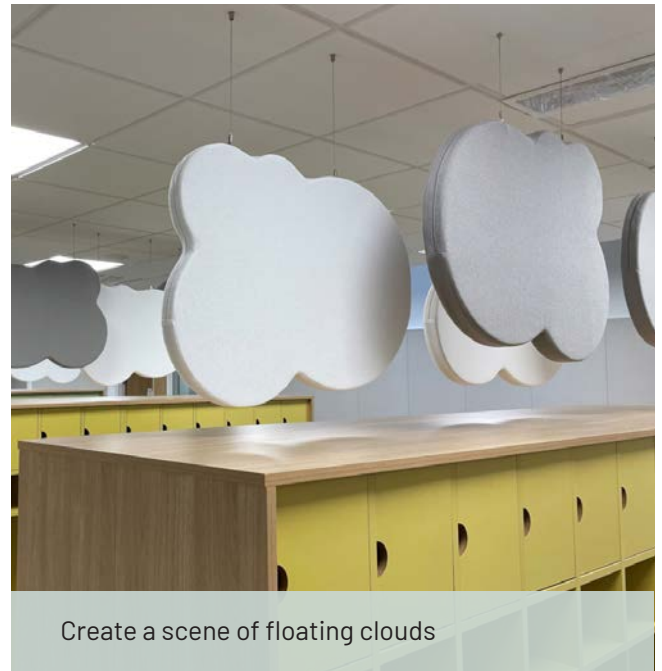

Soften the interior
with clouds

Hush Light Cloud Acoustic panels are a delightful solution for high ceilings when you want to reduce noise and create atmosphere with shapes and tones.

The shades of the panels can be inconspicuous or accentuated by the kind of atmosphere you want to create in the space.

Hush Light Cloud Acoustic panels can be wall or flat ceiling mounted. They can be mounted to hang vertical or horizontal from the ceiling.

Floating panels, brings softness, shape and colour to complete the atmosphere

Hush Hybrid

The perfect acoustic panel and ceiling microphone solution

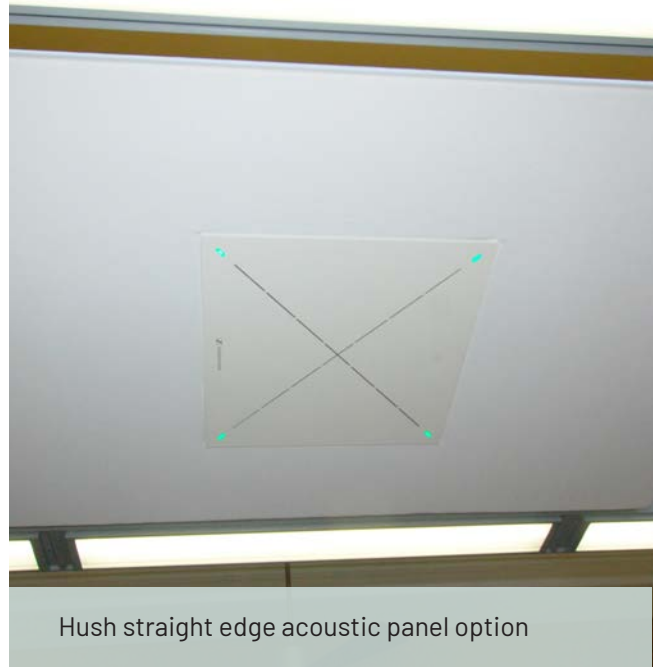

TK-Team's Hush hybrid acoustic panels integrate seamlessly with the Sennheiser TeamConnect Ceiling microphones to create the perfect conference environment in classrooms and conference rooms that have significant acoustic reverberation.

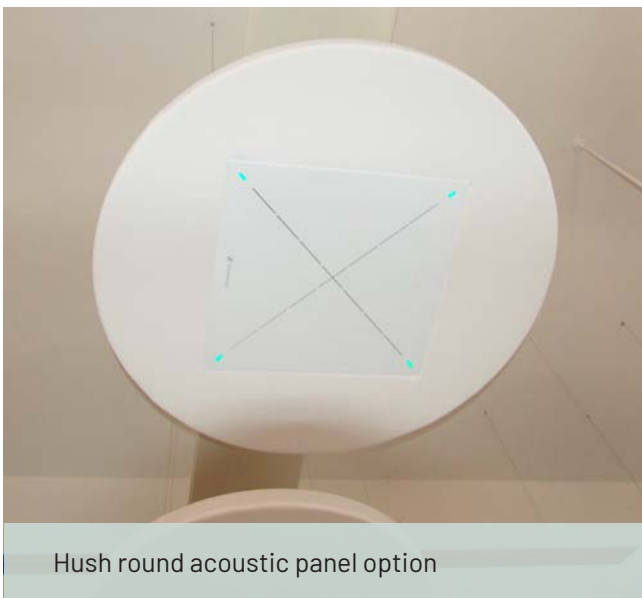

This solution ensures that users benefit from exceptional clarity and sound quality, allowing for seamless communication and engagement.

The panels are made from 55 mm Basotect® melamine resin foam, used in the aerospace and automotive industries for its lightweight, fire safety, and A-class sound insulation properties. Additionally, Basotect® is certified to the OEKO-TEX® Standard 100.

TK-Team's hybrid acoustic panels are not only available in various shapes and sizes, but can also be customised with prints.

Hush straight edge acoustic panel option

Hush round acoustic panel option

Available in various shapes and sizes, and can be customised with prints

Hush Wall

Multi-purpose mobile partition, acoustic control, writing and pinable

Both robust and stylish the Hush Wall dampens noise and creates a quieter private space. The partition extends almost to the floor so prevents noise from coming under the partition.

Fixed foot option

Available in 32 different fabric colours

Customise Hush Walls according to your needs

The acoustic element of the core is a Class A M1-classified acoustic panel. The upholstery is made of sound absorbing Camira Cara fabric, with 32 different colour options to choose from. Notes can be attached to the surface of the fabric with pins.

Hush Custom Image

Create your own visual

High-quality image prints create a unique atmosphere for any space. The printed fabric is folded behind the panel, so that the picture also continues the sides of the panel, which creates a three-dimensional impression.

Large panel sizes with room-filling potential

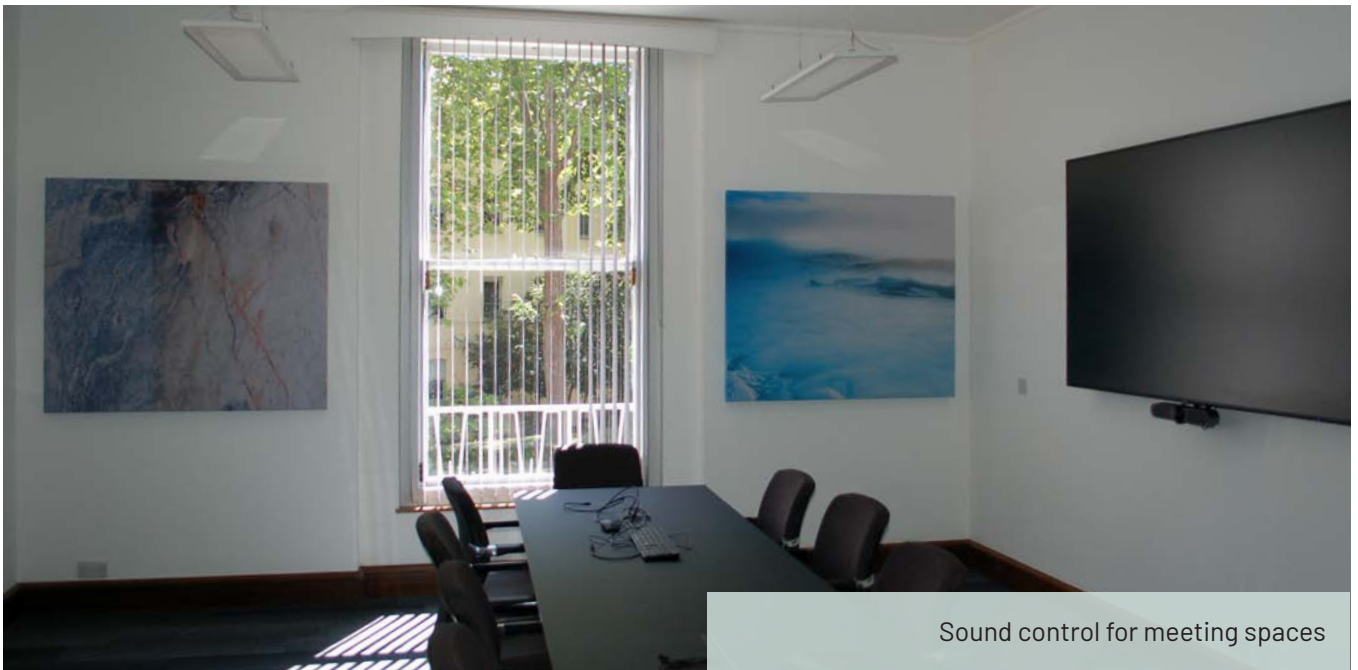

Perfect for busy public spaces

Images or designs can be used or we can help to create the desired atmosphere in the space with images from an image bank.

Hush Custom Image Acoustic Panels come in custom or standard sizes and can be used in spaces where you want to create a unique atmosphere, offices, schools and public spaces.

Hush Custom Image Acoustic Panels with Class A-rated sound absorption

- European indoor air classification
- Fireproof and does not contain harmful chemicals
- Max single panel size 3.6m x 1.5m

Printed sides create three-dimensional impression

Acoustic Performance and Fabrics

What is Basotect® ?

Basotect® guarantees optimal sound attenuation and is the ideal material in offices, restaurants, meeting rooms, public spaces, schools and universities. Any area where unwanted noise is a problem.

Basotect® is a very light material and retains its desired shape. Thanks to its light weight, the panel is suitable for use in all architectural applications, ceiling-mounted, suspended shapes or wall mounted.

The panel is made of Basotect® 55 mm foam, which is fireproof and does not contain fibres or harmful chemicals. Class A sound attenuation and European indoor air classification.

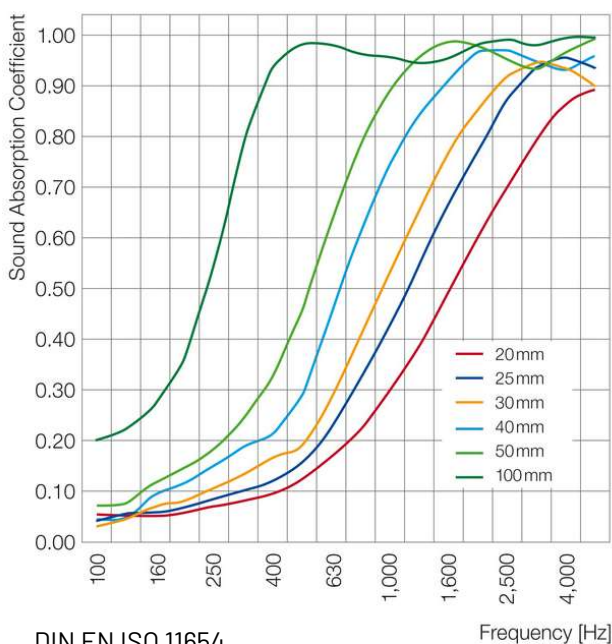

Your choice of fabric

Hush Light Acoustic panels can be upholstered with Camira Cara, Hush by Gabriel or Soul by Gabriel fabrics. All are available in a wide range of colours.

Camira Cara is a plain weave panel fabric available in a wide selection of commercial colourways. One of our most popular vertical surface fabrics, Cara is used extensively on desk screens, wallsides and on pin boards. This fabric is largely acoustically transparent and as such is ideal to be used as a decorative facing for sound absorbing boards.

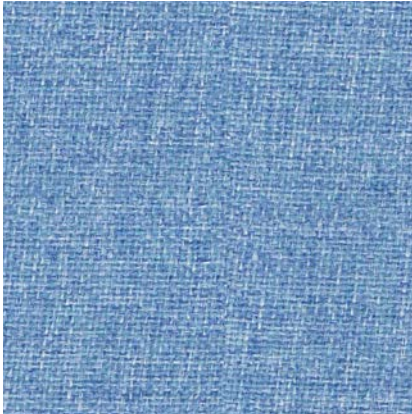

Hush by Gabriel is designed for screens and room division Hush adds a cosy, homely feel, absorbs sound and softens up indoor spaces.

Soul by Gabriel is an exclusive and timeless wool felt fabric. With its thickness, density and natural elasticity it offers a structural quality, which makes it highly suitable for vertical surfaces, screens and panels.

Sustainability

In our sourcing of materials, we strive to choose suppliers that consider environmental & health impacts, product quality, M1 (the term stands for low emissions), Class A sound absorbing and fire safety.

When selecting our materials, we also consider the eco-ratings and certifications our material suppliers have received.

Why are eco-ratings and certifications so important?

Eco ratings help our customers and stakeholders make responsible choices and provide important information about materials.

Optimisation of our logistics, we strive to reduce transport emissions, both in the ordering of raw materials and the delivery of finished products to our customers.

At our factory and at all our sites, we recycle waste such as cardboard and paper separately.
